

TAKE OFF WITH A CAREER IN AVIATION

Launch your career as a pilot and benefit from a unique course structure that will see you graduate with a degree in aviation with CQUniversity while completing flight training locally with Oberon Aviation.

As an aviation student, you will benefit from combining aviation theory in the Bachelor of Aviation with practical flight training embedded into the Graduate Diploma of Aviation (Flight Operations), meaning your flight training can be deferred using FEE-HELP making it an affordable option to become a pilot. Plus, you'll have the option to gain your commercial pilot licence and benefit from our partnerships that can take you into a career with Australia's major airlines.

To find out more, contact

Oberon Aviation

CL09 – BACHELOR OF AVIATION

The Bachelor of Aviation prepares you for a career as a professional airline pilot. Studied over three years, you will learn the aeronautical theory required to gain your Commercial Pilot Licence and the Air Transport Pilot Licence theory component.

FIRST YEAR UNITS

- » Basic Aeronautical Knowledge
- » Basic Aeronautical Practice
- » Aviation Physics
- » Aviation Law
- » Flight Planning, Performance and Operation (Private Pilot Licence)

SECOND YEAR UNITS

- » Commercial Pilot Licence: Aerodynamics, General Aeronautical Knowledge, Navigation, Meteorology, Flight Planning, Performance and Loading, and Aviation Human Factors
- » Instrument Flight Rules and Procedures

THIRD YEAR UNITS

- » Air Transport Pilot Licence: Navigation, Meteorology, Aerodynamics and Aircraft General Knowledge, Aviation Human Factors, Flight Planning, Performance and Loading, Multi-Crew Cooperation, and Aviation Safety Management Systems
- » Multi Crew Coordination Endorsement on our B737 Simulator

HECS-HELP is available to eligible students studying the Bachelor of Aviation.

In combination with your current studies in our Bachelor of Aviation, you can enrol in our Graduate Diploma of Aviation (Flight Operations) to begin your flight training. To enrol in this course, you will need to successfully pass your first term of study (2 units), hold a Class 1 Aviation Medical, current Australian Security Identification Card and be approved by CQUni's Head of Course.

CL17- GRADUATE DIPLOMA OF AVIATION (FLIGHT OPERATIONS)

The Graduate Diploma of Aviation (Flight Operations) is studied concurrently with the Bachelor of Aviation and will provide you with the aeronautical experience required for a career as a commercial pilot.

You will build your skills as a pilot with Oberon Aviation starting with short flights right through to commercial pilot licence level.

FIRST YEAR UNITS

- » Aeronautical Practice 1
- » Aeronautical Practice 2
- » Recreational Pilot Licence

SECOND YEAR UNITS

- » Aeronautical Practice 3
- » Aeronautical Practice 4
- » Advanced Aeronautical Practice 1
- » Private Pilot Licence and Command Instrument Rating

THIRD YEAR UNITS

- » Advanced Aeronautical Practice 2
- » Advanced Aeronautical Practice 3
- » Commercial Pilot Licence Air Transport Pilot Licence theory component

FEE-HELP is available to eligible students studying the Graduate Diploma of Aviation (Flight Operations) which will allow you to defer costs associated with flight training.
